TELL ME WHAT
POST-POSTMODERNISM IS?

no. ~~you~~ WE're not ready

in short: the current reaction to

PoMo by means of PoMo

more specificity is only possible after
the fact! it's the present!

TELL ME WHAT
YOU THINK IT IS?

OKAY! ✓ ^w^

but first-

III Pre-Modernism

(-1500s)

- Authority/Hierarchy from God
 - Knowledge through Faith
 - Local Community, Shared Morality
-

■ Modernism

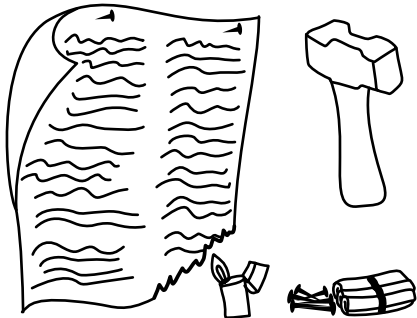

(1600s-1900s)

- Renaissance, Enlightenment
 - Progress, Capital, Materialism
 - Knowledge from Man
 - OBJECTIVE truth via Science & Reason
 - Autonomy
-

📄 Post-Modernism

(1950s-20XX)

- CRITIQUE & Skepticism
- Rejects metanarratives, category
(who gets to say what's true?)
- Truth is SUBJECTIVE
- Irony, Relativism, Nihilism, Individualism
- + DECONSTRUCTION & CRITICAL THEORY

THE THESIS

IF modernism
constructed frameworks based in
reason and objectivity

AND postmodernism
deconstructed those frameworks based in
metanarratives
truth relies on power structures to propagate!

THEN post-postmodernism
reconstructs new frameworks based in
new metanarratives of the modern age

CONCEPTS YOU

IRONY: literary device of insincerity to prove a point by saying the opposite of what one means

functions on a base of reality

POST-IRONY:

return to sincerity from irony; can be:

- being sincere where irony was expected
- something ironic continuing to the point where it's no longer ironic
- something "absurd" being sincere

because it ceased to function on the base of reality

META-IRONY:

earnest and ironic intents become muddled
you cannot tell what is or isn't sincere

often used to protect oneself from criticism

"schrödinger's asshole" is an extrapolation from this
or gauge the reaction to a statement

it doesn't convey actual meaning

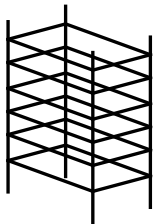

SHOULD KNOW

POST-TRUTH: (especially within public opinion)

emotional truth > logical facts

in a world filled with noise, stories that we hear & claim to be true, and subsequently resonate with; is what we decide to accept as true; even if they're not based in reality, or are internally inconsistent
(preceded by manufacturing consent)

it's not lying (necessarily) but rather our relation to (un)truth

FRAMEWORKS

OR: WORLDVIEWS

= A SYSTEM OF BELIEF
(about how the world works)

based in
some
axioms

example:

ideology: framework for politics

MBTI, Big Five: framework for personality

META-NARRATIVES

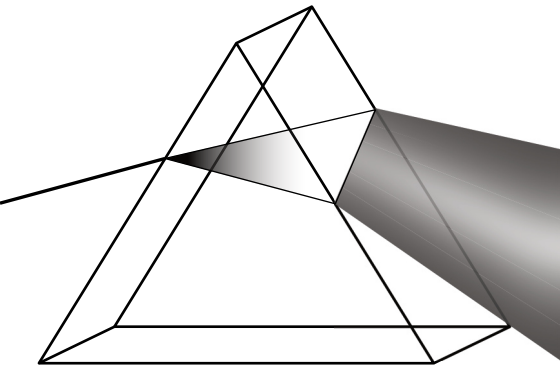

overarching framework to explain
historical narratives

- Marxism: emancipation & class struggle
- Enlightenment: progress
- Modernity: scientific objectivity

human experience fragmented

⇒ impossible to fit everything into
one explanatory framework -Lyotard

STRUCTURE

PRISMATA

(all idea's mine from this point ♥)

while social structures that
encompass our identities
continue to loosen,

our self-expression within it,
especially due to atomization
become more granular
and spectrumizes it

we create new modes of
identification out of
the old

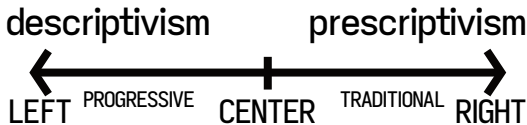

a framework that
granularizes a structure
i call it a PRISMA ← LATIN
plural: prismata

some of those aim to
describe how someone
(and makes it fluid) expresses/identifies

others aim to dictate how
someone should express/identify
(can reinforce the old structure)

here's an axis ♥

ISOMORPHISM

= structure-preserving transformations

1. some structures behave extremely similarly, that a framework in one can applied to the others
2. labels/categories that coincide across prismata

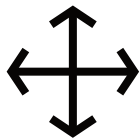

EXAMPLES:

economics
philosophy
politics
religion

} thought/
human
organization

identity

{ gender
race
personality
nation
generation

AXIS

= spectrum between 2 opposing ideas (ex: libertarian-authoritarian)

frameworks in a system can be placed on, and organized alongside an axis

DESCRIPTIVISM

record & describe how something is.

PRESCRIPTIVISM

establishing/formalizing ideal norms
for how something should be

made by dogs

CRINGE
IS
DEAD

DO WHAT YOU WANT!

the
medium
is the
message
